OUR APPROACH

Using industry-leading products and techniques, we endeavour to completely tailor each facial at the time of each appointment. The skin is a constantly changing organ that is affected by our diet, environment, fitness routine and hormones amongst many other factors, and the way that we care for our skin needs to reflect those variables. Therefore, each InParlour facial will combine a different range of products and massage techniques to address each client's current skin care requirements.

We are proud partners of 111 Skin, innovators in skin research and skin care. Each InParlour facialist is trained regularly by the brand, enabling us to introduce our clients to the latest techniques and ingredients on the market.

Whether you are looking for a results-driven cosmeceutical facial or something more soothing to aid relaxation, our range of facials caters for all preferences and concerns.

This is followed by lymphatic drainage massage to help lift, de-puff, and balance the skin. The facial is finished with a serum and a treatment moisturiser selected for your skin.

BODY

OUR APPROACH

Regular massage is proven to have a multitude of health benefits that go beyond physical relaxation. The effect has a huge impact on both a physical and emotional level, from combating postural stresses and chronic muscle pain, to relieving anxiety and boosting our immune function. Each massage therapist is trained to work with your body and will use a variety of techniques and products to suit your individual needs.

INPARLOUR’S SIGNATURE FULL BODY MASSAGE

Whether you are looking for pure relaxation or something remedial, our masseuses will custom select products, pressure and focus areas entirely for you. Our signature massages are beneficial for improving blood circulation, decreasing muscle toxins, increasing the level of oxygen in the blood, easing muscle tension and increasing flexibility. A consultation will be provided at the beginning of your session to tailor our approach to your needs and preferences.

60 mins: £180

DEEP TISSUE MASSAGE

Using a slow pace and firm pressure, this whole-body massage works to alleviate chronic pain and long-term muscle tension. Deep tissue therapy is focused on realigning the deepest layers of muscle and connective tissues and is concentrated on target areas to help reduce enduring physical stresses and injuries.

MYOFASCIAL RELEASE

Myofascial Release is a specialised physical and manual therapy used for the effective treatment and rehabilitation of soft tissue and fascial aches, pains, tension and restrictions.

This is a deep therapy using sustained firm pressure to the fascia (connective tissue) to ease long term physical, emotional and habitual trauma by relaxing and loosening areas that have become restricted. This also leads to improved blood and lymphatic circulation. The treatment is performed directly on to the skin without oils, creams or tools.

TANNING

OUR APPROACH

Our tanning artists are trained personally by Amanda Harrington in her Bespoke Body Contouring Technique. As part of their training they are shown how to look at each client's skin colour, undertones and skin type and to discuss their unique expectations. Products from the Amanda Harrington London range are then selected to suit each particular client and the occasion.

Each appointment begins with the application of barrier cream to protect typically dry areas, followed by a hydrating tinted base-cream which is applied by hand. Customised colour tint is then applied using Amanda's range of tanning brushes, which ensures a natural and streak-free finish that can last up to 10 days. Colour can then be built and strengthened in key areas to camouflage blemishes and, using Amanda's contouring techniques, to give the appearance of a defined and sculpted form.

A preparation and aftercare guide will be provided prior to your first appointment.

the AMANDA HARRINGTON[®]
Technique

‘I can't rave enough about the service that was provided, from the tan itself but also the professionalism from the tanning artist.’

BESPOKE BODY CONTOURING BY AMANDA HARRINGTON[®]

Having established herself as an internationally acclaimed makeup artist and body painter, Amanda Harrington developed her own technique, tools and products to enhance the appearance of the body and face through tanning.

Amanda's love of the body and of makeup artistry lead her to create a skin care and sunless tanning range that takes her understanding of makeup application and facial skin care and applies it to the body. Her approach to tanning centres on a unique layering and application technique that ensures a longer-lasting, natural colour and defined finish.

Amanda's revolutionary approach to sunless tanning began with the creation of her own unique tooling range: tanning brushes. By applying her colour products with a brush, you are able to tan delicate areas such as wrists and ankles with extra precision and care, removing the risk of streaking and patching. Using Amanda's Bespoke Body Contouring Technique, the brushes can also create definition, camouflage blemishes and emphasise bone structure.

Amanda Harrington is the
Michelangelo of tanning

ALL THREE AREAS: FOREHEAD, FROWN & EYES:

£399

We recommend every 4 months.

FACE CONTOURING & SLIMMING THE FACE SHAPE WITH BOTOX:

Face slimming involves Botox injections to reduce the size of the masseter muscles. This reduces the width of the lower face, and brings the face shape to being oval. By making the lower face less prominent, attention is drawn to the cheek bones and eyes.

Because it's quite a large muscle and in the middle of the cheek, the masseter has a big effect on the shape of the face. A strong masseter muscle makes the face look square. After treating the masseter muscle, the face shape becomes more oval or heart-shaped. When treated, the area under the cheek becomes less wide, and the contour of the jaw line is soft and slim.

Treatment cost: £500 - Advised every 4-6 months.

UNDER ARM:

Botox injections can effectively reduce sweat production and improve the appearance of skin in the armpit area for people with severe underarm sweating. These injections typically last for about six months and may also help to reduce body odour caused by excessive sweating. However, it is important to remember that results may vary from person to person and that it may take several weeks before any improvements are seen.

Treatment cost: £600 - Advised every 6 months.
