

# InParlour®

## *Bespoke Eyelash Extensions*

### **Before your appointment:**

- Please have clean eyes for your appointment: do not wear any eye makeup and, if possible, do not wear any other makeup or heavy creams around the eye area

### **Immediately after your treatment:**

- Do not touch your eyelash extensions for the next 24 hours to allow the glue to fully dry and the lashes to settle
- Avoid water coming into contact with the eyelashes for 24 hours

### **Maintenance:**

- Brush your eyelashes daily with an eyelash brush
- Refrain from rubbing the eye area or pulling at the eyelashes
- If you would like to wear mascara, try to use one that is oil free as the oils in most mascaras will break down the eyelash glue
- Do not wear any waterproof eye makeup
- Avoid any oil based products including makeup removers and other cosmetics
- To remove eyeliner or eye makeup that is close to the lash line wet a cotton bud with an oil free makeup remover and gently cleanse the area
- If a lash does become crooked or out of place, gently comb the lashes with an eyelash comb
- Please do not attempt to personally remove any eyelash extensions as this can damage your natural eyelashes: professional removal is available
- The natural eyelash will typically grow out and shed every 4 to 6 weeks so we recommend booking infills every 3 to 4 weeks

### **Please note:**

- If you have remaining extensions from a different brand, we ask that you wait until they have all dropped out or have them removed before getting a full set from InParlour
- If you have any known allergies please make the therapist aware before commencing with the treatment
